

Sounds Good

The sound your system plays when events happen can be accessed or changed from Control Panel. Select 'Sounds'.

Is your computer slow to boot-up? Why not have windows notify you when the boot process has ended.

Under the Windows heading select Start Windows. Next select a sound in the sound preview frame. Preview the sound using the right-facing triangle button.

You can save your customize sound scheme using Save As...

Do an Internet search on "Wav" or "Sound Files". Hundreds of free sounds are available.

Sounds are associated with actions.

First, select an action.

Next, open the Name: drop down list and select a sound.

Preview the sound by clicking on .

Remove a sound by selecting (None) from the drop down list.
